Step by Step cleaning instructions

PLEASE WASH YOUR HANDS BEFORE YOU BEGIN YOUR TASK

- Only trained operatives to use this machinery.
- Transport machine to area of work in transport mode being aware of pedestrians & vehicles on route
- Place safety signage around area to be cleaned.
- Use litter picker and bag to remove any larger debris
- Only operate machine in conditions and manner it was designed for
- Depending on the machine used, chemical may either be mixed into water tank or applied direct to surface to be cleaned.
- Work in a pattern to ensure all area required is clean, working at a safe effective pace / repeat cleaning process as required until desired effect is achieved.
- This machine is designed to clean tight to the edges so ensure this is achieved.
- Leave safety signage in place until area is dry and safe
