

Product Award

A visual indicator of a product's **sustainability** to support decision-making by using an objective set of **key sustainable attributes**.

The Sustainable Solutions Product Award helps customers overcome the difficulties of finding sustainable products by making it easier to identify sustainable options. The Product Awards visually signifies product sustainability, aiding informed decisions when selecting suitable cleaning and hygiene products, enhancing access to sustainable choices and fostering positive change in our supply chain.

The defined categories graded for each product:

PRODUCER

PACKAGING

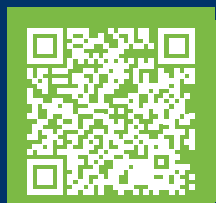

PRODUCTION

PRODUCT

We have established comprehensive criteria across product categories for an objective assessment of sustainability among our products. This criterion has four categories: Producer, Production, Packaging, and Product. Products receive awards (Bronze, Silver, or Gold) or No Award based on their performance. A total score is calculated, considering performance across these categories.
